

Water management in the College Campus

1. The college has installed Ponds for conserving the rain water. Later pond water is used in gardening of the college.

2. The college has installed a system wherein, after the water tank fills, the excess water is directed to the garden.

3. On World Water Day, 2023 the College organized a program to teach the students about the importance of water and its conservation.

4. The College has hand pump facility to reduce water waste.
